## TYDIX Flush Pulls

TYDIX Flush Pulls are ground and polished to furnish a square, flat dress face usually free of blemishes. All outside edges and corners are clean and sharp in appearance. Important inside surfaces are smoothed to a practical degree. All inside corners of the dress face are filed to full, sharp, square corners.

TYDIX Flush Pulls are available in a considerable variety of finishes and finish combinations. That is, the hardware finish of the dress face may be contrasted with, or complemented by, the color treatment inside the frame and/or color or finish of the back plate.

Accordingly, there are three “areas” where your color plans might be carried out: the Dress Face, inside the Frame, and the Back Plate. The following lists finishes or colors which might apply to each of these areas:

### FLUSH PULL FINISHES

<b>Dress Face Finish</b>	<b>Symbol</b>	<b>Inside Frame Color</b>	<b>Symbol</b>
Polished Brass	US 3	Satin Black	Blk.
Satin Brass	US 4	Brass Spray	236
Polished Bronze	US 9	Bronze Spray	277

## TYDIX Edge Pulls

Tydix Edge Pulls are handmade (not extrusions), fabricated to your design concepts, made to order to any door thickness, overlay or clearance . Meets ADA requirements.

The material used in Tydix Edge Pulls is solid brass or bronze, and any standard hardware finish except aluminum or stainless steel, are available.

Fabrication Specifications Include:

- Desired roll diameter (see B-5)
- Desired roll length (1-1/4" through 24")
- Desired style (see pages B-2 through B-4)
- Desired finish (see page B-5)
- RC for rounded roll ends

(Examples: BR 1/4" x 1-1/2, US 26, RC-SR 5/16 x 3, US 10B, DAF 3/8 x 4, US 10)

### To order furnish the above information plus the following:

Thickness of basic door or drawer (screws will be located accordingly, or per a provided drawing)

Thickness of any overlay (mirror, panel, etc.)

Clearance desired if other than standard (1/2")

Overall dimension (OA) if important. (OA = door thickness + overlays + clearance + roll diameter)

Angle of door bevel (types SAR and SAF) or other angles required (standard is 1/8" in 2")

Finish (see page B-5)

Note: a simple sketch can be invaluable
